TITLE:

Thin-film FET for memory - has source and

drain

electrodes buried in insulation film between

upper gate

electrode and film covering lower electrode

ABSTRACTED-PUB-NO: JP 2969184B

EQUIVALENT-ABSTRACTS:

Optical disk having a resin substrate has a trench on the periphery

resin substrates are adhered to each other. A groove or pit for

formed on a side of a resin substrate. A 1st ceramics layer, a

recording

layer, 2nd ceramics layer and a reflection layer are laminated in order. The

plates are adhered using epoxy gp. resin. A trench is formed at the periphery

and a UV curing type resin is filled into the trench. The resin is cured and

the periphery is cut.

ADVANTAGE - No change of mechanical characteristics at higher temp..
